

MAY 1991

IMPORT HEALTH REQUIREMENTS OF MALAYSIA FOR  
BOVINE SEMEN EXPORTED FROM THE UNITED STATES

The semen must be accompanied by a U.S. Origin Health Certificate issued by a veterinarian authorized by the U.S. Department of Agriculture (USDA) and endorsed by a Veterinary Services (VS) veterinarian. The certificate shall contain the name and address of both the consignor and consignee and complete identification of the semen to be exported. Additional information shall include:

CERTIFICATION STATEMENTS

1. The semen is derived from a semen collection center which is under the supervision of a USDA Accredited Veterinarian.
2. The United States has been free of foot-and-mouth disease and rinderpest for the six (6) months immediately preceding the collection of semen and until the time of export.
3. The donor bulls have been resident in the semen collection center for at least six (6) months prior to the date of collection.
4. The semen collection center has been free of any clinical signs of enzootic bovine leukosis for the 12 months prior to the date of collection.
5. The donor bulls were negative to the following tests within 6 months prior to the semen collection date:
  - a. Tuberculosis - intradermal caudal fold test
  - b. IBR - serum neutralization test at 1:8 dilution - IF POSITIVE - negative virus isolation from semen for export (one passage in cell culture)
  - c. Bluetongue - agar gel immunodiffusion test - IF POSITIVE - negative virus isolation from whole blood on the day of collection.
  - d. Brucellosis - standard tube or standard plate test at 1:50 dilution, 2 tests at 6 month intervals with the last test conducted within 6 months of the semen collection date AND semen plasma agglutination test at 1:25 dilution
  - e. Leptospirosis - microtiter agglutination test at 1:400 dilution, 2 tests at 6 month intervals with the last test conducted within 6 months of the semen collection date.

- f. Vibriosis and trichomoniasis - culture of preputial washings or swabs, 2 negative cultures at 6 month intervals with the last culture conducted within 6 months of the semen collection date.

OTHER NOTES: An import license issued by the Director General State Veterinary Director concerned permitting the import of such semen into the States/State of Peninsular Malaysia is required.

bovine semen fulfills the following requirements and conditions:

1. The United States has been free of foot-and-mouth disease  
and rinderpest for the six (6) months immediately preceding  
the collection of semen and until the time of export.
2. The semen is derived from a semen collection center which is  
under the supervision of a USDA Accredited Veterinarian.
3. The donor bulls have been resident in the semen collection  
center for at least six (6) months prior to the date of  
collection.
4. The semen collection center has been free of any clinical  
signs of enzootic bovine leukosis for the 12 months prior to  
the date of collection.
5. The donor bulls were negative to the following tests within  
6 months prior to the semen collection date:
  - a. Tuberculosis - intradermal caudal fold test
  - b. IBR - serum neutralization test at 1:8 dilution  
\*\* -if positive - negative viral isolation from semen for  
export (one passage in cell culture)
  - c. Bluetongue - agar gel immunodiffusion test  
\*\* - if positive - negative viral isolation from whole  
blood on the day of collection.
  - d. Brucellosis - standard tube or standard plate test at  
1:50 dilution 2 tests at 6 month intervals with the  
last test conducted within 6 months of the semen  
collection date.  
AND  
semen plasma agglutination test at 1:25 dilution
  - e. Leptospirosis - microtiter agglutination test at 1:400  
dilution, 2 tests at 6 month intervals with the last  
test conducted within 6 months of the semen collection  
date.
